MUHAMMAD ALI

Full-Stack Web & Mobile Developer (React, Node.js, React Native)

Karachi, Pakistan | muhammadali499a@gmail.com | +92 319 8390955
github.com/ali-webcraft | linkedin.com/in/ali-webcraft

PROFESSIONAL SUMMARY

Final-year Software Engineering diploma student and React developer who builds full-stack web and mobile applications. Built and shipped React Native (Expo) apps with Supabase and EAS builds, and developed a REST API with Node.js, Express and MongoDB (Mongoose). Seeking a junior full-stack or frontend developer role, internship or freelance projects building polished web and mobile products.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Next.js, Redux, React Router, Tailwind CSS, Shadcn UI, Axios, Vite
Mobile: React Native, Expo Router, NativeWind, React Native Paper, EAS Build
Backend: Node.js, Express.js, REST API design, Mongoose, JWT authentication (learning), PHP
Databases: MongoDB (Atlas), Supabase (PostgreSQL), SQL (basic)
Tools: Git, GitHub, Docker, Postman, MongoDB Compass, VS Code, WordPress
AI Tools: Claude, ChatGPT, Cursor, GitHub Copilot, Google Gemini API, AI-assisted development (code review, debugging, learning)
Languages: JavaScript, Java (OOP fundamentals), PHP

PROJECTS

Tanki Wala - Water Delivery Mobile App

React Native, Expo Router, Supabase, React Native Paper

- Built a full mobile app for a local Karachi water supplier with separate customer and supplier flows and a Roman Urdu UI.
- Designed a phone-number-to-email authentication workaround so users without email addresses can sign in with Supabase Auth.
- Implemented a customer loyalty points system and a custom design system for consistent branding.
- Produced EAS preview builds and resolved environment-variable bundling issues.

SMARTI - College Attendance Tracking App

React Native, Expo, Supabase, NativeWind

- Built a mobile attendance system for a college with teacher login, roll-number-based student access and a Supabase backend.
- Styled the whole app with NativeWind (Tailwind CSS for React Native) for a consistent, maintainable UI.
- Reviewed the codebase line by line, removing dead code and unused packages to improve performance before the release build.

Webcraft Inventory API - REST Backend

Node.js, Express 5, MongoDB Atlas, Mongoose

- Built a REST API with full CRUD for products, using a layered structure (routes, controllers, services, models).
- Added Mongoose schema validation, centralized error-handling middleware and request logging middleware.
- Implemented filtering, sorting, name search and pagination (total count, total pages, page/limit clamping) via query parameters.
- Built an atomic stock-update endpoint using MongoDB $inc with a conditional findOneAndUpdate to prevent negative stock.

UserBase App - Full-Stack Auth & Post Management

React, Redux, Supabase, Tailwind CSS, Axios

- Built Supabase email/password authentication with protected routes that redirect unauthorized users to login.
- Implemented create, read and delete for posts with persistent login state using Redux Persist.
- Added automatic JWT token injection with an Axios interceptor, a dark/light theme toggle and form validation.

Gemini AI Chatbot

Next.js, Google Gemini API, Server Actions, react-markdown

- Built an AI chatbot with the Google Gemini API (@google/genai), with model calls handled through Next.js Server Actions.
- Rendered formatted AI responses using react-markdown in a dark-themed chat interface.

EDUCATION

Diploma in Software Engineering (3 Years) - Final Year | SMA Rizvi Textile Institute | Expected completion: 2027
